About Us

Arab energy, established in the year 2012 and operating in KSA, is one of the Kingdom's leading Diesel power providers thriving to pioneer the service industry. With state of the art Power Generation equipment, integrated services and best practices in QHSE; we provide safe, innovative and reliable solutions for the power needs.

We possess an extensive experience in supply, installation, testing, commissioning, operation and maintenance of low and medium voltage Diesel Power Generators with transformers, load banks, LV and MV cables and fuel supply systems.

We provide the power solutions ranging from 20 KVA to multi MW, catering to the power needs of clients in various sectors including plants, construction, events etc.

"Arab Energy exploits the opportunities to demonstrate its quality workmanship & reliable service to make a long term mutually beneficial relationships with the clients"

"We add Value to your business"

Why Arab Energy ?

Being a leading power provider, Our prime focus is on the service quality and highest work standards which assure the best support and uninterrupted operations to the clients.

With our well trained service team, we are delivering most reliable round the clock service (24X7) to our valued customers. We are well equipped with 10,000 Sq. mts of storage yard with modern workshop & tools, which altogether striving to keep the name Arab Energy, a symbol of service quality and work standards.

"We believe our strength lies in the team work"

Each and every member of the company is committed towards a common goal which is to give the best service to the customer. We are committed to the safety and well being of employees and customers with zero compromise in safety and commitment.

The value we bring you begins in the development stage of a project and continues through the start-up, and long term operation and maintenance of a facility. Our proof is in our performance.

Our Vision

We are aiming to be the first choice among the best power providers in the kingdom with integrity, Work Ethics, Technical Expertise, Safe Work Practices, Quality services and Consistent Performance.

Our Mission

Being a specialized diesel power provider, we consider our valued customers are the integral partner and perceive every project as a partnership opportunity that not only upholds but also reinforces our cherished values regardless of the project. We walk an extra mile to ensure that partnership would be mutually beneficial.

Our Values

Commitment

Customer service satisfaction
with 24x7 service

Quality maintenance

Safety

Temporary Power Plant

We offer various power plant hire solutions to ensure uninterrupted power supply for various projects. We help to keep the power supply secure and your business is up and running.

Power plants generally consist of a number of generators running continuously to produce prime power and a number of back-up generators for standby power. We ensure that you have uninterrupted power supply round the clock with our power plant in place.

We provide rental power solutions with Diesel Generators ranging from 20 kVA to 2000kVA with following features:

- Sound Attenuated Containerized Generators
- 60Hz Generators
- Up to Max. 100MW Plant Capacity
- Zone II Fitment & Offshore Generators

Hybrid Power Solutions

- Combination of diesel generator & solar
- Long term power requirement
- Green solutions
- Fuel saving

Distribution Panels

Arab Energy provides rental electrical distribution, including circuit breakers, switchgear, load panels, panel boards are precisely matched with our generator rentals.

Transformers

Arab Energy has a wide variety of Rental Transformers for utility, commercial and heavy industrial applications

Load Banks

Arab Energy offers resistive and reactive (inductive and capacitive) load bank rentals for various industries such as oil & gas, utilities, maritime, heavy industries, telecom, data centers and healthcare.

Load bank hire enables testing of power equipment, leading, lagging and unity power factors which prevents power failures and maintain reliable power equipment. Load banks are available in various sizes: from 55kW to 1000kW

Power Cables

Temporary power requires heavy duty industrial cable. Generator sets, grounding, power cable extensions, mining, and oil drilling are just a few applications for Type W power cable. We provide three sizes of Type W power cable, all in 50 foot lengths, with cam lock ends, with or without our generator sets.

Fuel Tanks

Arab Energy offers the most reliable, safe and environment friendly rental fuel tanks available in the market. All rental fuel tanks are double bonded to provide utmost safety and security. Fuel tanks for hire are available in various capacities

Other Equipment Rentals

Welding Machines

Arab Energy supplies compact Diesel Powered Miller 500AMPs Welding machines for industrial uses. We have Top branded units and are suitable for running plants which includes diesel tank and air-cooling units. The units have the provision to use power supply for other equipment.

Forklifts

Arab Energy offers a large fleet of industrial forklifts from Doosan, Genie and JLG with the capacities ranging from 3 Ton to 16 Ton and height capabilities up to 197 inches. Customers can choose from pneumatic-tire, cushion-tire or electric-rider industrial forklift models. We provide the right industrial forklift equipment when your project requires heavy lifting.

Air Compressors

Arab Energy supplies Portable Air compressors with standard pressure and high pressure units as per the industrial requirement. Our Diesel Powered Air compressor ranges from 185 CFM to 1500 CFM with operating pressure of 8 to 24 bar. Our brands include Atlas Copco, Satc, Elgi, Ingersoll Rand etc. We offer 1000 CFM and 1500 CFM oil free Air Compressors with accessories.

Tower lights

Arab Energy supplies compact Diesel Powered mobile light tower for outdoor use on rental basis. We have the brands Atlas Copco, Magnum and Generac light towers, with 50 gallon fuel tank included for up to 100 hours of running time. The Control panel includes a 120 Volt GFI and a 240 Volts twist lock receptacle for the equipment's at job site.

- Mechanical & hydraulic tower lights
- 9mt mast height - Metal Halide (4x1000W) / LED (4x500W) tower lights
